Benefits of GRP

SMC (Sheet Molding Compound) is a composite of unsaturated polyester resin reinforced with glass fiber (12-50 mm long) as well as mineral filler and other additives. In addition to basic components such as polyester resin, fibre-glass and filler, SMC contains various additives in the form of thickeners, anti-adhesive agents and flame retardants.

- Very good mechanical properties
- Resistance to high temperature
- Fire-resistance (self-extinguishing plastic)
- High resistance to low temperatures
- Resistance to weather conditions (UV)
- High insulation
- Easy machining (for holes and cutouts)
- Very good anti-corrosion properties
- Lightweight construction
