

Mine-Spec Enclosure Accessories

IP-PSID6060-HD-X15

STEEL | INNER DOOR ESCUTCHEONS | HEAVY-DUTY

512H x 524W

The IP Enclosures PSID range of Inner Door escutcheons are both designed and manufactured to easily fit into steel and stainless steel IP Enclosures Mine-Spec wall mounted electrical enclosures without drilling. Inner doors are tool lockable.

It is important to check the depth of the enclosure to ensure that the minimum distance between the electrical components and inner door is maintained. Enclosures up to 400mm deep are available to ensure large components can be safely housed behind inner door escutcheons.

Compatible with: IP-SSR606035-HD-X15 & IP-SSSR606035-HD-X15
