

STEEL | VENTED DOORS

Suited for Pole-Mounted Field Cabinets

IP Enclosures provides a range of vented doors for steel Pole-Mounted Field Cabinets. Vented doors feature pressed louvre vents to enable ventilation. The pressed louvre vents are positioned at the bottom and top of the door to enable enhanced airflow and air circulation. Vented Doors are optional interchangeable door assemblies that can be easily installed on new or existing IP Enclosures electrical enclosures and they are to be used with Non-Ventilated Pole-Mounted Field Cabinets.

Material:

- Door: 1.5mm Galvanised steel sheet.

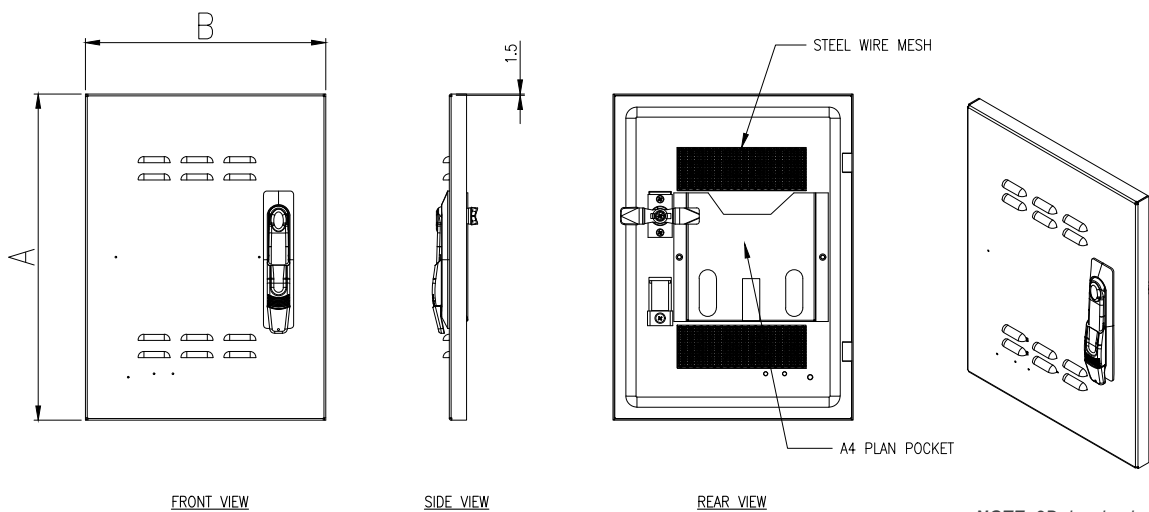

Door: The robust door is fabricated from 1.5mm galvanised steel sheet and incorporates multiple pressed louvre vents positioned at the top and bottom sections to facilitate improved airflow and ventilation. The door is fitted with a gasket and a steel wire mesh installed behind the louvre vents, providing enhanced protection against the ingress of foreign objects. An A4 wiring/document storage plan pocket can also be fitted to the inside lower half of the access door panel to provide storage for site documentation.

Surface Treatment: UL approved AkzoNobel polyester powder coated with a smooth gloss finish. 80-120 micron average thickness, providing excellent exterior durability and colour retention. Colour T33 Smoke Blue.
